

URTeC OKC Workshop: Optimizing Oklahoma from Execution to Production

The URTeC Oklahoma City workshop (operated by SPE) is designed to address industry-relevant subjects that affect business decisions today. Oklahoma contains a variety of conventional and unconventional resource plays that benefit from collaboration across engineering and geological disciplines. Stimulation practices including frac hits and induced seismicity will be covered along with reservoir characterization and production practices. Come hear from industry professionals, make new connections, and learn current best practices to maximize your production.

You can conveniently register at the following website as well as obtain additional information:

Program at a Glance

Wednesday, 26 June 2019	
7:00a – 7:30a	Registration
7:30a – 8:00a	Continental Breakfast

8:00a – 8:15a	Welcome Comments
8:15a – 9:15a	Keynote – George King 'Damage and Causes of Fracture Driven Interactions (Frac Hits): Recognition, Longevity and Control'
Session 1: Reservoir Characterization	
9:15a – 10:15a	
10:15a – 10:30a	Coffee Break
Session 2: Stimulation	
10:30a – 12:00p	
12:00p – 1:00p	Lunch
Session 3: Production	
1:00p – 2:30p	
2:30p – 2:45p	Coffee Break
Session 4: Induced Seismicity	
2:45p – 4:15p	
4:15p – 4:30p	Closing Comments
4:30p – 5:30p	Networking Reception
